Designing and building automation equipment and precision molds

MONSELICE,01-01-2012

SUBJECT: COOPERATION PROPOSAL

TO PURCHASING OFFICE MANAGER
PRODUCTION MANAGER

With this document we would like to present out company that designs and builds assembly lines, special machines and equipment for industrial automation. Develops and manufactures, progressive dies for small metal items with high technical content. The company is ISO 9001:2008 certified and operates in the market hy the end of the eighties.

Thanks to our engineering we can build custom made production plants, after careful study of feasibility analysis and design. Our clients are companies in need of costs reduction on medium and high production.

Our plants are supplied "turnkey", complete in all parts: hardware, software and all documentation needed by rules.

We guarantee personal training of operators that will use our equipments and post-sales assistance. One of our company's mission is to establish a customer/supplier relationship based on confidence and cooperation.

In our twenty years of experience we have provided assembly lines and special equipment to companies of major northern Italy, and have established ongoing collaborations over time.

Sectors where the our company has designed and built facilities are:

- Automotive
- Household
- Appliances
- Manufacturing of electrical cables and wiring
- Electrical and Electronic Components
- Gas valves, burners, boilers
- Sections processing
- Serramenti

Our company also produces:

- Test equipment for electrical, flow, pressure measuring devices
- work benches for semiautomatic assembling
- masks work for CN machine tools
- Packaging equipment and special packaging

We remain at your disposal for further information and clarification.
We invite you to browse the brochure attached to this document and visit our website where you can view a few facilities we made.

Greetings,

DELTA ENGINEERING s.n.c.
